

```
39.import java.util.Scanner;

class Test {

    public static void main(String args[]) {

        String str1, str2;

        Scanner scan = new Scanner(System.in);

        System.out.print("Enter a String : ");

        str1 = scan.nextLine();

        str2 = str1.replaceAll("[aeiouAEIOU]", ""); // Replace vowels with an empty string

        System.out.print("All Vowels Removed Successfully..!!\nNew String is : ");

        System.out.print(str2);

    }

}
```

Output

```
java -cp /tmp/XoWgV4ECk0 Test
Enter a String : sudeep
All Vowels Removed Successfully...!!
New String is : sd|
```
